

Shipply.Vision Truck

Enhance supply chain visibility with
contactless first/last mile tracking

Leverage mobile and QR technology for efficient communication, transparency, digitalization, and more accurate information.

Benefits

- Drivers are able to use their own devices which drives high end user adoption
- Does not require drivers to download any software or applications
- See shipment status across all supported airlines in a web-based application
- Respond to events in real-time to enhance customer experience and business agility
- Measure efficiency and allocate resources more effectively using the data collected

ENJOY SEAMLESS AND INSTANTANEOUS DATA TRANSMISSION STRAIGHT TO YOUR TRANSPORT MANAGEMENT SYSTEM.

In today's highly connected world, the uninterrupted flow of goods is crucial for our economies and communities to function properly.

With more than 3.5 million companies involved in the transportation of goods, and with countless moving parts, it is critical to ensure that every moment of visibility and efficiency is optimized.

In the logistics industry, where outsourcing is common, the challenge has always been connecting the first mile to the last mile seamlessly.

At CHAMP Cargosystems, we believe the key is to enhance door-to-door visibility in the simplest way possible.

How do we achieve this? Shipply.Vision Truck is our revolutionary solution designed to bridge gaps across the logistics chain with just a QR code or a web link — for drivers, companies, and everyone.

Features

Utilizing QR codes allows both freight forwarders and truckers to bypass the use of an app

Drivers simply use their mobile's camera to scan a QR code, which links all the relevant information to a URL inside Shippy.Vision Truck

Information is automatically populated and transmits time, date, geolocation and images via API to any freight forwarder's TMS

Capture the full name of person at delivery, which helps if signature on POD is not clearly legible

Significantly improve data reliability and experience efficiency gains in the form of cost and time savings

Drivers can report delays and discrepancies, provide photographic evidence, and give regular status updates

Customer dynamic branding means the Shippy.Vision Truck interface aligns with your businesses branding

Benefit from real-time tracking and visibility with Shippy.Vision

Shippy.Vision reduces the complexities drivers face when sending crucial shipment updates and creates a more complete and interconnected supply chain.

A simple scan or click allows drivers to communicate status updates, submit proof of delivery, and get instant e-signatures.

Even if unexpected issues arrive, Shippy.Vision Truck easily notes the type of issue – like damage, missing items, or incorrect quantity – and attach photo evidence.

The data collected can also offer metrics for the company to measure long-term efficiency and allocate vital resources to more lucrative routes.

Furthermore, the realization of real-time data in first/last mile tracking offers customers the service that is now an expectation, not a perk.

Unlock enhanced supply chain visibility and contactless first/last mile tracking today with Shippy.Vision Truck.

Our Portfolio

CHAMP Cargosystems provides the most comprehensive range of integrated IT solutions and distribution services for the air cargo transport chain. Our portfolio spans Cargo Management Systems, messaging and integration services through our Community Integration Platform and a comprehensive suite of eCargo solutions. These include applications to meet customs and security requirements, quality optimization, as well as e-freight and mobility needs. The products and services are well known under the Cargospot and Traxon brands.
