

# Traxon Global eCommerce

Your comprehensive solution to navigating the complexities of ICS2 reporting

*CHAMP Cargosystems' Traxon Global eCommerce is your comprehensive solution to navigating the complexities of ICS2 reporting, offering tailored features to ensure compliance, streamline processes, and enhance overall visibility.*

## Benefits

■ Automate ENS Entry Summary Declaration

■ Support your legal compliance processes with access to detailed history and data archives

■ Color coded dashboard with referral management

■ Submit goods and cargo declaration data before loading

■ Stay compliant by transmitting pre loading information required by different local authorities

### SIMPLIFY AND ACCELERATE YOUR SHIPMENT FILINGS WITH TRAXON GLOBAL ECOMMERCE:

Import Control System 2 (ICS2) is a European Union (EU) customs initiative designed to enhance security and safety in international trade. The IT system was created to collect data on all eCommerce goods entering the EU through an Entry Summary Declaration (ENS) prior to their arrival.

As a purpose-built solution, TRAXON Global eCommerce ensures compliance with regulatory standards, facilitates efficient information exchange, and enhances overall visibility throughout the cargo handling and clearance processes.

### PRE-LOADING PROCESS

The pre-loading process involves the electronic submission of pertinent goods and cargo declaration data to authorities before loading onto various vehicles such as aircraft, vessels, or trucks. This preemptive submission allows authorities to conduct risk assessments, process declarations, and make release decisions before cargo departure. TRAXON Global eCommerce facilitates referral management for additional actions (e.g., shipment scanning) or data corrections, empowering senders to manage these aspects. Our software also maintains a detailed history and archives data to ensure compliance with legal requirements.

### PRE-ARRIVAL PROCESS

The pre-arrival process, TRAXON Global eCommerce supports the electronic submission of relevant goods and cargo declaration data to authorities before the actual arrival. This includes essential declarations such as the Entry Summary Declaration. Authorities leverage this data to conduct risk assessments and process declarations, enabling them to prepare release decisions in advance of the goods' arrival at the port of entry. This proactive approach facilitates immediate goods release upon arrival, streamlining supply chain and logistics planning.

# Features

## Compliance Assurance

Ensures compliance with EU-ICS2 standards for both pre-load and prearrival declarations

## Enhanced Visibility and Efficiency

Monitor and action any notifications issued (RfI, RfS, DNL) and action any referrals from a centralized dashboard

## Automate Data Exchange

Consolidate information from sender and generate outputs in formats specified by relevant governmental agencies

## Robust Encryption

Our tool features robust encryption protocols for sensitive information protection

## Open and Integrated

Benefit from a platform-agnostic software that seamlessly connects to fellow Traxon and Cargospot products

## Global Regulation Considerations

CHAMP regularly updates Traxon Global eCommerce to support the latest compliance initiatives.

# Make Traxon Global eCommerce your partner in navigating the ever changing compliance and regulation landscape

With the ever changing landscape of EU regulations coming into effect, CHAMP Cargosystems is dedicated to supporting you with your eCommerce regulatory requirements.

ICS2 poses potential risks for the eCommerce industry if air carriers, freight forwarders, express courier service providers or postal operators do not ensure they have the processes or technology in place to respond to these new requirements.

Traxon Global eCommerce can be leveraged to stay compliant while looking at growing eCommerce business. Our platform agnostic, easily integrated software features robust encryption protocols, color coded dashboards and ensures compliance with ICS2 pre-load and pre-arrival declaration requirements.

# Our Portfolio

CHAMP Cargosystems provides the most comprehensive range of integrated IT solutions and distribution services for the air cargo transport chain. Our portfolio spans Cargo Management Systems, messaging and integration services through our Community Integration Platform and a comprehensive suite of eCargo solutions. These include applications to meet customs and security requirements, quality optimization, as well as e-freight and mobility needs. The products and services are well known under the Cargospot and Traxon brands.
